

DEALERSHIP TITLE OPERATIONS, SIMPLIFIED

Every title. Every deadline. Every rooftop. Under control.

Dealer Title Tracker gives title teams and managers one organized place to follow every unit from acquisition through title perfection - without chasing spreadsheets, inboxes, and disconnected logs.

TITLE PERFECTED

Follow-up open

Awaiting confirmation

Follow-up needed

Title packet was sent. Keep this record visible until title perfection is confirmed.

Demonstration content only. Names, identifiers, dates, and vehicle details are synthetic and do not represent a customer record.

Synthetic demonstration data. No customer records are shown.

See the workflow in action

Request a relaxed 20-minute demonstration tailored to your stores and title process.

REQUEST A DEMO

ONE RECORD FROM ACQUISITION TO COMPLETION

The complete title lifecycle

Each stage keeps the facts, evidence, and unresolved work connected to the unit.

Core functions

VEHICLE RECORDS

Acquisition, disposition, title or MCO status, prior lienholder, payoff, notes, documents, and history stay connected.

MULTI-STORE OVERSIGHT

Authorized users can work within one rooftop or review the assigned organization.

EXCEPTIONS

Missing titles, releases, sold units awaiting shipment, and other unresolved work remain visible.

SHIPMENTS AND REPORTS

Record packet details and tracking, then use consistent reports and exports for follow-up and management review.

Clearer work at every level

TITLE CLERKS

Prioritize missing and aging documents. Keep notes and shipment follow-up with the unit.

MANAGERS & CONTROLLERS

See title exposure and workflow status without assembling another spreadsheet.

DEALER GROUPS

Apply a shared process across rooftops while keeping access controlled.

Onboarding

Set up stores, users, imports, training, and the enabled workflows your team needs. Plans reflect rooftop count, users, transaction volume, integrations, and support.

Supported scope

State-specific fee, document, Police Book, and Deal Log tools apply only where supported, enabled, and reviewed. Customers verify filing requirements and transaction accuracy.
